Universal

POLYTHEX

the fast extrusion company

100% of the electricity used by Universal Polythex Kunststoff GmbH is to be ESWE Natur STROM “Premium”, as supplied by ESWE Versorgungs AG until December 31, 2025.

All of the electricity purchased by the customer comes entirely from facilities that generate electricity from renewable energies.

This green electricity is certified as follows:

- No harmful CO₂ emissions occur during production.
- At least 33% of the supply comes from recently built facilities.
- ESWE has no involvement with any nuclear, brown-coal-fired or new coal-fired power stations.
- Annual, independent certification.
