

Universal

**POLYTHEX**

the fast extrusion company

**100% of the electricity used by Universal Polythex Kunststoff GmbH is to be ESWE Natur STROM "Premium", as supplied by ESWE Versorgungs AG until December 31, 2024.**

All of the electricity purchased by the customer comes entirely from facilities that generate electricity from renewable energies.

This green electricity is certified as follows:

- No harmful CO<sub>2</sub> emissions occur during production.
- At least 33% of the supply comes from recently built facilities.
- ESWE has no involvement with any nuclear, brown-coal-fired or new coal-fired power stations.
- Annual, independent certification.
